

Hocamp Shoreline Restoration

Wyanett Township, Isanti County

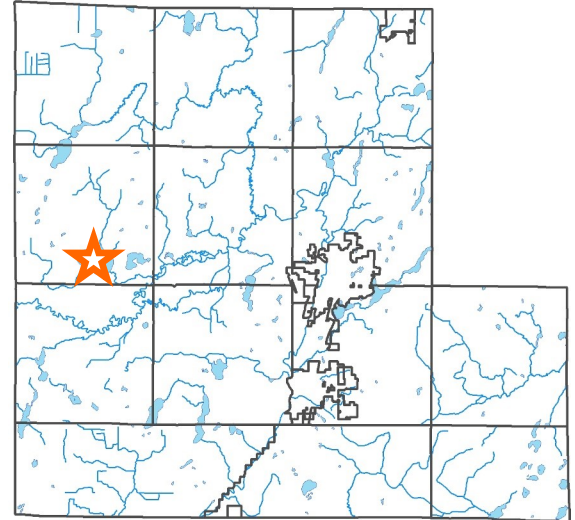

Shoreline Stabilization

Project Summary

This project is located on Green Lake, Isanti County, on private property. The project includes a shoreline stabilization to reduce shoreline erosion. This project was installed to amend and reinforce a project that was installed in 2021.

This project was completed with the help from a MN Pollution Control Agency grant obtained by the Isanti SWCD. The goal of the grant is to protect the health of Green Lake, a sought after waterbody for fishing, boating, kayaking and other recreational water activities.

The private landowner is among several partners in the Green Lake Watershed that have dedicated resources towards protecting lake health. These projects would not be possible without willing landowners and the Green Lake Improvement District!

Project Location

<u>Project Details</u>	<u>Project Funding</u>	<u>Pollutant Reduction (2021 Project)</u>
<p>Target Water: Green Lake</p> <p>Date Installed: August 2023</p> <p>Project Size: 360 sqft</p>	<p>MPCA 319: \$15,765</p> <p>Total: \$15,765</p>	<p>Phosphorus: 4.02 lb/yr</p> <p>Sediment: 5,320 lbs/yr (2021)</p> <p>Volume: NA</p>

40 in/ft of shoreline stabilized using rock and native vegetation.

Rock used to armor the shoreline during extreme weather events that are common to Green Lake.
